

PRICE LIST 2017 EN
(VAT EXCLUDED)

Valid from 01.08.2017

SYMBOL DESCRIPTION

Thanks to first-class manufacturing, robust construction and high-quality materials – including cast-iron doors, Heta A/S stoves are ideal for constant use with approved smokeless fuels.*

* Excludes Classic inserts, Panoramas, Scan-Line 95, Scan-Line 100.

The patented 3-litre, 5-litre and 8-litre Heta ash pans are an outstanding and practical detail. The ash pans make ash removal easy and are highly functional.

Heta A/S stoves can also be equipped with a thermostone. The thermostone constitutes extra heat storage and makes room heating more efficient than an ordinary stove.

The convection air STOP function allows the user to shut off convection air flow after the heating phase in order to direct the flow of heat energy into the heat-retaining stone or soap-stone cowling, thus making room heating even more efficient.

Integrated accessories deliver functionalities exclusive to Heta A/S stoves. A set of wood-burning fireside tools (brush, pan and poker) is included.

The stove is supplied as standard with a swivel function. The rotation arc is 0 - 90°. The stove can be locked in the desired position.

Thanks a thoughtful design, it is very easy to clean and maintain this pellet stove.

The capacity of the pellet tank in kilo

By using Heta Hot Air Supply, it is possible to heat several rooms.

The combustion Air system ensures that the pellet stove always burns perfectly.

As an option a WiFi app module for operating the stove via iOS Apple, Android smartphone can be purchased.

The pellet stove can be ordered with top outlet

The pellet stove can be ordered with back outlet

Estimated room size m2

Heat output kW

Exceeds all regulatory requirements: Our CLEAN BURN+ stoves already score top marks for eco-friendliness. Our stoves have a very low noise level and CO2 emissions that are at least 50 % lower than the strictest requirements.

As an option, Heta stoves can be fitted with a swivel plinth and flexible flue.

Performance on the water side in % and it is already at 30 % less than the nominal output.

The total height of the stove in cm

Efficiency %

The Heta Automatic Combustion "HAC" option can be purchased, for optimal combustion.

Heta stoves with this mark complies with the requirements of BlmSchV, level 2

Heta stoves with this mark complies with the requirements of the Austrian regulation §15aBVG 2015

Heta stoves with this mark complies with the requirements of the Swiss regulation VKF

Thermastone Scan-Line 830

Heta thermastones

Dreaming of accumulating heat from a wood-burning stove over several hours? With HETA stoves your dream comes true! Depending on your choice of model, there is space for up to six thermastones, which make it possible to store heat while regulating or even shutting off convection air flow.

Our thermastones are made of a special cement-based material that absorbs heat extremely effectively and then releases it slowly over a longer period of time – Perfect in combination with fast-heating Heta stoves!

5 Year warranty

Cast iron base and grate

Danish Quality

Ceramics

Outdoor air connection

Product range

Cast iron door

Clean Burn

Sandstone

Fireside tool set

Ashpan

Granite

Enamel

Baking oven

We design our wood-burning stoves with insight and respect for craftsmanship

A wood-burning stove must fulfil many needs. It must heat the home, look good in the room and be environmentally sound. And of course on a cold day it must keep you warm and cosy.

For us, design is more than look and style. It is about finding new ways and creating a harmony between form and function. A harmony that means your Heta stove brings pleasure every day for years to come.
